## Dimensions to consider in the Comparative Study of Intergenerational Transfers

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Time</th>
<th>Organization</th>
<th>Direction</th>
</tr>
</thead>
</table>
| - Number/Size of potential network  
- Individual characteristics: (social, economic, demographic.)  
- Relational characteristics: kin vs. non-kin, proximity, relative need  
- Individual vs. institution or agency | - Defining “generations”  
- Cohort effects  
- Frequency/Regularity  
- Lifetime measurement  
- Ongoing vs. "crisis-response" | - Type of Transfer  
  - Space, time, money, emotional)  
- Units of Measurement  
  - kin/market or kin/kin  
  - Within/across household  
- Direct vs. indirect  
- Redistributive vs. Reciprocal | - Inter- vs. Intra-Generational  
- Up vs. Down  
- Inflows vs. Outflows (giving v. receiving) |
